1 Device on/off

Connect to the power source, and press the "Power On/Off" button to turn on the device.

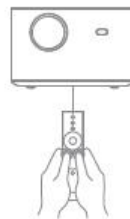

When the device is on, press the "Power On/Off" button to turn off the device.

2 Remote control pairing

Place the remote control within 10 cm of the device, press "Back" and "Home" simultaneously until an indicator light begins flashing. This means that the remote control enters the pairing mode. When a "Ding" is heard, the connection is successful.

If the pairing fails, it will exit after 30 seconds. Repeat the above steps after exiting.

3 Automatic focus adjustment/Remote focus adjustment

When the automatic focus adjustment function is enabled, the frame will be adjusted automatically when you turn on the device or move it to another location.

Enable automatic focus by pressing "Focus". After holding on to the "Focus" button to enable manual focus adjustment, you can manually adjust the focus by pressing the "left/right" button or the "VOL+/-" button. After the adjustment, you can press other buttons to exit.

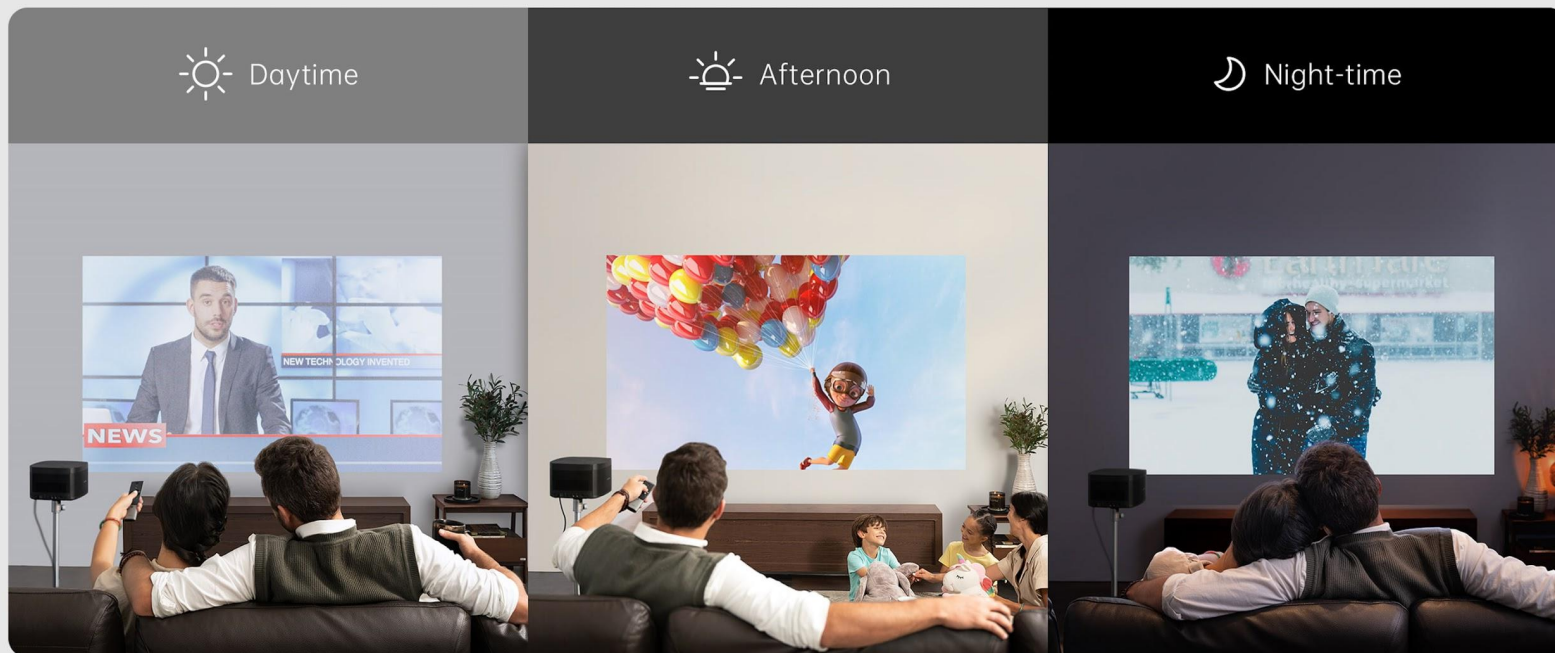

More Brains, More Brawn, Less Hassle

Meet Horizon, the most versatile and easiest to use true 4K home projector from XGIMI. Horizon packs premium features into an intuitive and powerful package. Take all the work out of finding the perfect 4K picture; just turn on Horizon in any room and reshape your cinema experience in seconds, right out of the box. Get more immersive anywhere you choose with industry-leading picture quality, intelligent imaging features, and Hi-Fi sound from Harman Kardon. No more limits, no more hassle.

We've Always Been Bright

Horizon's super bright projection technology outshines the competition; that means no more bother choosing a different room or screen angle during daytime or in bright environments. Horizon is the brightest projector in its class by nearly 30%, putting out a stellar 2200 ANSI Lumens. Horizon will consistently deliver high colors and super sharp images, even in bright environments.

Auto
Keystone
Correction

XGIMI's industry-leading automatic keystone correction technology aligns Horizon's 4K picture vertically and horizontally to custom fit your walls or screen to a perfect aspect ratio. Use the manual keystone to further customize your screen for up to 45 degrees lateral projection.

Intelligent
Screen
Alignment

HORIZON Pro turns on fully in seconds, and uses cutting edge intelligent screen detection to automatically match your screen size with the size of the projected image.

Built-in AI finds objects in your viewing area and scales the image instantly, keeping your gaming or cinema experience uninterrupted.

Cutting-edge autofocus keeps your image vivid and clear, all the way to the max screen size of 300".

Brilliantly Colorful, Shockingly Smart

Horizon combines the most powerful imaging features from XGIMI and makes them even more adaptable with a built-in AI optical sensor. With low latency, stunning contrast, and integrated optics, Horizon makes quality and consistency faster and more automatic than ever.

Reduction

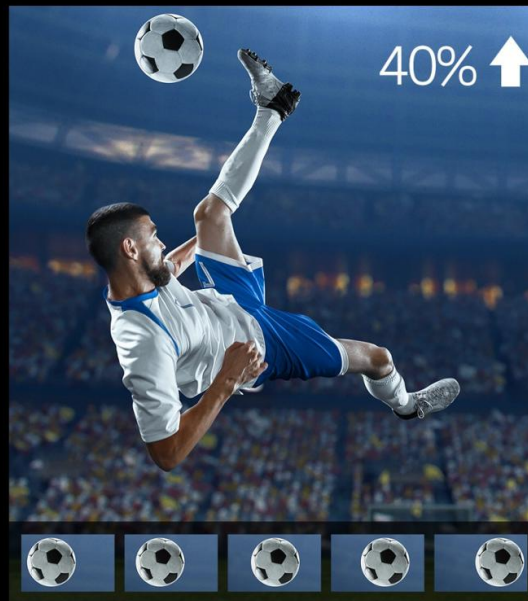

XGIMI's unique X-VUE image engine system significantly increases the clarity and fidelity of dynamic pictures. The image quality is made clearer and smoother, with purer and more realistic colors it brings a truly immersive user experience.

MEMC

Horizon delivers a super low latency with the least amount of image blur using MEMC frame interpolation technology. XGIMI's proprietary 60Hz motion compensation technology uses a specialized algorithm to prevent image flutter and tailing when projecting dynamic images. Sports, movies, and all of your favorite games will stay sharp and clear, even in the heat of action.

Without MEMC

With MEMC

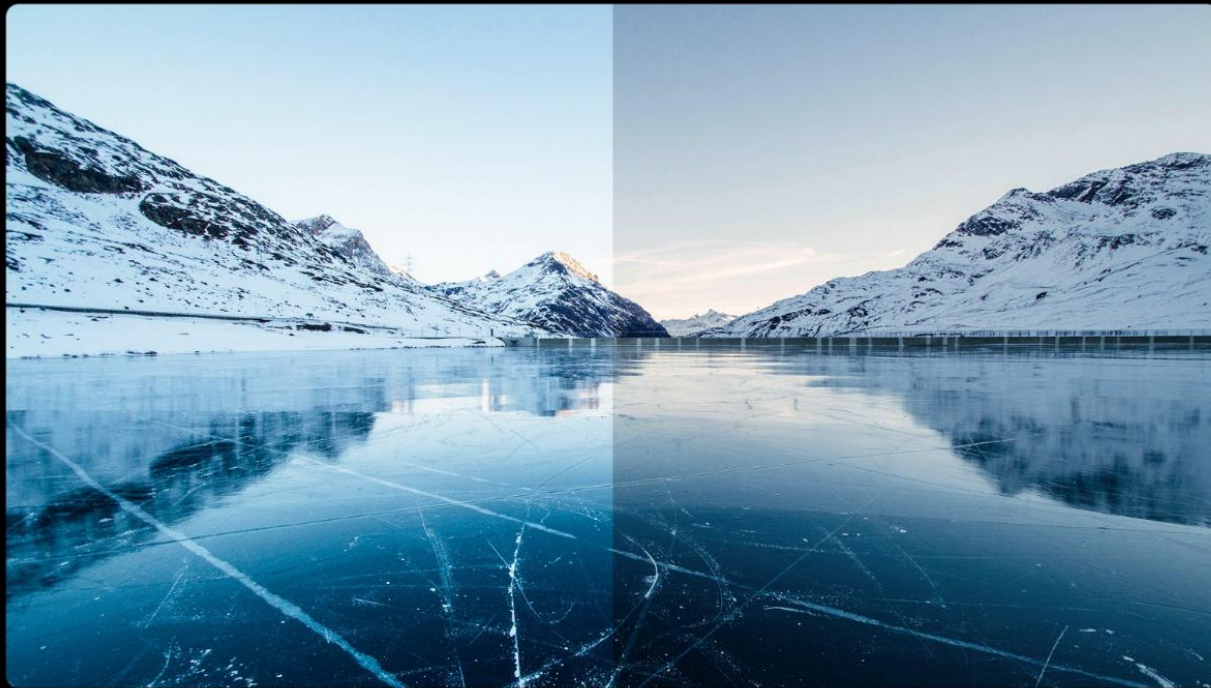

HDR 10 & HLG

Horizon uses HDR 10 technology to bring you an impressive contrast ratio in bright or dark environments. Enjoy your content in full detail, any time of day. Compatible with Hybrid Log Gamma broadcast standard, Horizon provides full HDR images across broadcasters, so you never miss a moment of the big match.

AI Brightness Adjustment

Horizon has an integrated optical sensor that works with XGIMI's AI to detect and respond to objects in its way, as well as changes in ambient light. Automatic brightness adjustment ensures that as ambient brightness levels change, your picture remains bright and colorful. Say goodbye to manual adjustments and enjoy a seamless cinema experience in any room, any time of the day.

—SOUND BY—
harman/kardon

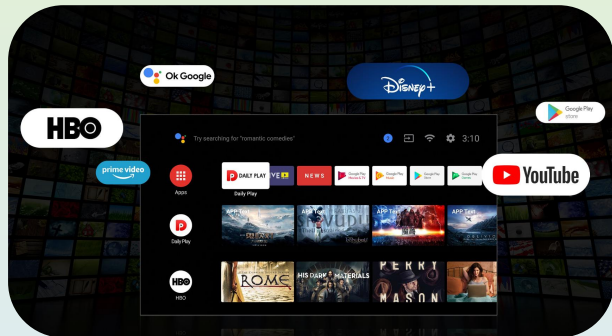

Dolby Audio

dts

Enjoy theater quality sound from two 8W, 45mm full-range speakers developed specifically for Horizon. Harman kardon sound provides unparalleled immersion and balance, with low distortion and high dynamic response. Combined with DTS Studio Sound Technology, Horizon can deliver a virtualized surround sound audio experience with dialog and bass enhancement. You can even use Horizon as a high-fidelity Bluetooth speaker by simply connecting it to any device.

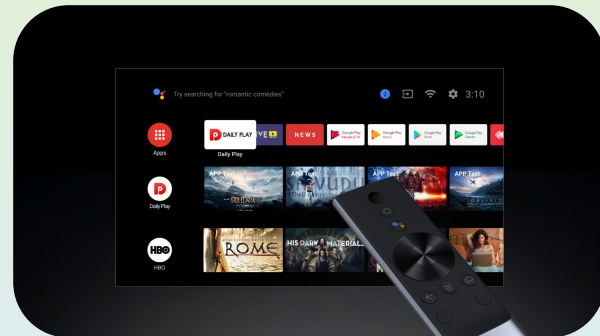

Your Home, Your Apps

With Google Play Store and Android TV integration, use Horizon to access 5,000+ native apps including HBO, Showtime and YouTube.

Chromecast integration lets you cast your content, apps, and games directly to Horizon from your favorite devices.

Press the Google Assistant button on Horizon's remote to instantly access the voice assistant. Control your connected smart devices, search for content, or open your favorite apps.

Live More, Waste Less

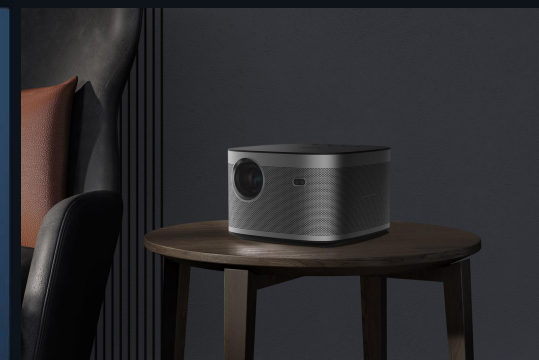

Horizon strengthens XGIMI's commitment to both our users and the environment. More durable devices provide more use and help reduce waste. Horizon uses an ultra-efficient LED light source, giving perfectly crisp, clear images for its entire lifespan -- up to 10 years, even with 8 hours of daily use.
